POLIN SPHERE WATERSLIDE: Polin Waterparks and Pool Systems has announced the completion of its newest signature attraction, the **Sphere** waterslide. Introduced at IAAPA Attractions Expo 2012 in Orlando, the Sphere is manufactured with Polin's resin-transfer molding technology, which provides a shiny, smooth finish on both sides of the slide. It also features Polin's patented Natural Light Effect technology, which allows the tube to "come alive" with a rainbow of shifting colors during daylight. The Sphere is available in a fully enclosed version or a partly open version and offers conveyor or tower-entry options, as well as optional visual and auditory special effects.
